MANAGERS ASSOCIATION

Certified Regulatory Professionals Program

with focus on Chemicals

A program developed and taught by Regulatory Representatives and Managers Association (RRMA)

2024

Certified Regulatory Professionals Program

ABOUT THE PROGRAM

RRMA Certified Regulatory Professionals Program (Chemicals) is a program specifically designed for those who would like to learn and specialize in chemical product regulatory compliance, resulting in a Certified Regulatory Professionals (Chemical) Certificate from RRMA. It is the first ever program of its kind to offer chemical regulatory professionals the opportunity to get certified in their field.

The program covers essential topics related to regulatory compliance, safety standards, and best practices in handling chemical products. Through a combination of theoretical knowledge and practical applications, participants will gain a comprehensive understanding of compliance requirements and how to ensure adherence to regulations in their respective industries.

LEARNING OBJECTIVES

Key objectives for regulatory professionals in the chemical sector (Regulatory manager, Compliance manager, Regulatory affairs manager) are:

- To understand the role of a regulatory professional (Regulatory manager, Compliance manager, Regulatory affairs manager etc.) within various existing regulations impacting its business
- Good general understanding of the regulatory regime, technical standards, obligations and/or barriers know how, why, what, how, etc.
- Understanding of technical standards/regulations in chemical sectors
- Identifying regulatory needs and compliance requirements within industry
- To understand and interpret the SDS and take necessary actions
- To understand and interpret the chemical safety assessment and take necessary actions
- To understand and interpret the Harmonized Classification system of chemicals and take necessary actions
- To understand and interpret the compliance responsibility within the supply chain
- To be able to advise on the compliance requirement and strategy requirement of the organization
- Understanding market driven voluntary standards and certifications in chemical sectors and making appropriate choices

- Module 2.6: Country Specific Regulations on Chemicals: India

Total work time: 13 hours

Section 3: Voluntary certifications applicable to chemical industry

- Module 3.1: Voluntary certifications
- Module 3.2: Sustainability certifications

Total work time: 2 hours

ELIGIBLE CRITERIA

One of the following scenarios must apply:

- Diploma in Science or Technology with a minimum of 7 years of experience in relevant industry
- Graduate in Science or Technology with a minimum of 5 years of experience in relevant industry
- Postgraduate in science or technology with a minimum of 3 years of experience in relevant industry

MODE OF DELIVERY

The course will be delivered online through a LMS platform, allowing participants to access materials and lectures at their own convenience. Although live online lectures will take place, self-paced learning is also possible, enabling individuals to balance their professional commitments with their educational pursuits.

COURSE FORMAT

Each lecture will be a maximum of 1 hour (45 minutes + 15 min Q&A). Some modules may require multiple lectures to cover complex topics in depth. Additional reading material will be provided to supplement lecture content and enhance understanding.

ASSESSMENT

Assessment will be based on multiple-choice questions and answers, designed to evaluate participants' comprehension of course material and their ability to apply concepts in practical scenarios. The program finishes with a final exam.

CERTIFICATION

With the successful completion of online modules and exams, participants will receive Certified Regulatory Professionals (Chemicals) certification from RRMA.
